

SUPPLEMENT 2: CHIROPRACTIC SYSTEMS

FIELD TEST RECORD EDIT CHECKS

When performing this supplementary procedure, the following changes to the edit checks on page AR-11 of the procedures manual apply:

1. Verify that a "B" is entered in data item 1.
2. Verify that the manufacturer, model number, and serial number for the vertical cassette holder are entered in data items 4 and 5.
3. Verify that the certification status of the vertical cassette holder is indicated in the "other" box of data item 6.
4. The chosen SIDs (edit check #11) can be greater than 50 inches (125 cm) at data items 52, 57, 62, and 65. Also, an SID of 72 inches is acceptable on the field test record.
5. If the indicated SID at data item 9 is 72 inches (182.9 cm), then data items 57, 58, 59, 65, 66, and 67 should be blank.
